

Alberto Onzo

Full stack Developer

Profile

Full Stack Developer with 6 years of experience across enterprise and institutional platforms, specializing in Angular and .NET with both relational and non-relational databases. Skilled in owning the full delivery cycle—from Figma design to production deployment—including UI/UX design, backend architecture, and DevOps. Experience spans aerospace (ESA), automotive (Iveco), and telecommunications (Sky) sectors.

Work Experience

Fides c/o Data Reply c/o Iveco, Turin

11/2024 - Present

Full Stack developer

- Designed Figma mockups for a legacy application redesign, presented to the client, and implemented end-to-end.
- Designed and implemented a hybrid AngularJS/Angular 19 environment enabling gradual, zero-downtime migration to production.
- Identified and remediated security vulnerabilities detected via SAST scans (SQL injection, HTML tag sanitization) across multiple microservices.
- Managed production deployments through Azure DevOps pipelines and monitored services using kubectl and AWS.

Capgemini c/o ESA, Rome

09/2021 - 10/2024

Full Stack developer

- Designed and developed new user interfaces for the "Doing Business with ESA" platform.
- Delivered bug fixes and new features across the esa-match and esa-star Publication modules.
- Built dynamic web applications using .NET Core 3.1 (MVC, Web API) and Angular 8.2 with RxJS.
- Delivered responsive UIs with Bootstrap, CSS, and Telerik Kendo UI, including a custom Google Maps integration.
- Engineered the data layer via EF Core (LINQ), SQL Server, and MongoDB. Built Windows Services for background processing.
- Integrated Elasticsearch for high-performance search and CryptoJS for data encryption.

Kineton c/o SKY, Naples/Milan

10/2020 - 08/2021

IT Automation Developer

- Developed Python automation scripts with Gherkin for testing Sky Set-Top Boxes.

AR/VR Developer

02/2020 - 10/2020

- Developed multi-platform applications using C# and Unity3D.
- Built immersive virtual environments using Unity3D and Blender.
- Developed mobile applications leveraging AR (ARCore) and VR technologies (Cardboard, Oculus, HTC Vive).
